

Aluminium Stairway Access Tower

StairMax

**STAIRMAX**

Youngman's StairMax has been introduced to provide a safe and simple solution to working on stairways and stairwells. StairMax adds to the portfolio of Youngman's products that provide simple and safe access to difficult-to-reach areas. Stairwells are a good case in point, with access often restricted by the width of the staircase. This compact tower is just 0.6m wide and 1.2m in length, making it suitable for commercial and domestic stairwells. It is compact both in its usage and also for transport purposes. It offers a platform height of 2.0m from the lowest stair, with the adjustable twin guardrails allowing easy and secure access.

- Safest portable access option for domestic stairwells.
- Platform height 2m from lowest stair.
- Compact for domestic stairwells.
- Components will fit into a hatchback car or small van, reducing delivery/collection costs.
- Safe adjustable twin guardrail allowing easy and secure access.
- Minimal components for simple stock management and effective utilisation.
- Maximum safe working height of 3500mm.

Order Code	Component Name	No. of Components	Weight (Kg)
356513	Horizontal Brace 1.3m	6	1.00
357513	Diagonal Brace 1.64m	2	2.00
